CONNECTICUT LABOR SITUATION

JOB SERVICE

CONNECTICUT LABOR DEPARTMENT

EMPLOYMENT SECURITY DIVISION
HARTFORD 06115

P. JOSEPH PERARO
COMMISSIONER

November 1980

Employment increased to its highest level since June, unemployment continued to decline and personal income and weekly wages set record high levels during October, it is reported by State Labor Commissioner P. Joseph Peraro.

Employment, Wages and Hours: Employment in non-farm jobs was estimated at 1,405,430, up from 1,403,360 in September (Page 2), and the highest since last June. Gains of more than 3,000 jobs in nonmanufacturing were partly offset by a decline of nearly 1,000 employees in manufacturing industries. Nonmanufacturing employment increases were centered in service and government, due in part to hirings of support staff in educational systems after the summer recess.

A record $301.29 was reached in the average weekly pay of manufacturing production workers, with hourly earnings up by six cents to $7.26 for a slightly longer workweek of 41.5 hours. In October 1979, earnings were $279.36 at $6.62 per hour for a 42.2-hour week (Page 3). Computed on a straight-time, 40-hour week basis, earnings this October would have been $279.20 at $6.98, up 10.4 percent from $252.80 weekly and $6.32 hourly last year. The highest worker earnings were in Ansonia at $329.60 per week, followed by Hartford, $324.59; Bristol, $323.08; Middletown, $316.31; Bridgeport, $315.23; Norwalk, $313.69 and New Britain, $310.06 (Page 6).

Unemployment: Unemployment at 90,200 or 5.6 percent in October compared with the September level of 93,100 or 5.8 percent. The seasonally adjusted unemployment rate of 6.2 percent also remained well below the national figure of 7.6. Ten labor market areas recorded lower unemployment, five others had increases and one remained unchanged (Page 4). Included in the unemployment estimates were those persons receiving unemployment benefits, others who were ineligible or whose benefits had expired and people entering or reentering the labor force.

Other Indicators: Personal income of state residents continued its long-term trend, reaching a new monthly high. New auto registrations, the average workweek and manufacturing output improved, and initial (new) claims for unemployment benefits declined in October on a seasonally adjusted basis (Page 7).

U.S. CONSUMER PRICE INDEX - ALL URBAN CONSUMERS
Base Period (1967=100)

	Oct. '80	Sept. '80	Oct. '79
All Items.....	253.9	251.7	225.4
Percent Change From....	xxx	+ 0.9	+12.6

BRIEF EXPLANATION OF THE CPI-The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. It is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day to day living. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing a new CPI for all Urban Consumers which covers approximately 80 percent of the total noninstitutional civilian population. It includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force. The CPI shown above represents U.S. city averages and is not seasonally adjusted.

THERE IS NO SEPARATE CONSUMER PRICE INDEX FOR CONNECTICUT OR ANY AREA WITHIN THE STATE.
